LinkedIn	linkedin.com/in/ruslan-hasanoff-34208a218
Nationality	Turkmen

Profile

AI/ML engineer focused on time-series forecasting and LLM agents. Master's student at TU Ilmenau on a full DAAD scholarship, coursework done, thesis until 03/2027. Before that, four years of building mobile apps with 55,000+ downloads. Available now, part-time or full-time.

Education

10/2024 – 03/2027 **M.Sc. Research in Computer and Systems Engineering**, *TU Ilmenau*, Germany, 90 CPs, average grade 2.1
Courses: Deep Learning, Advanced Database Systems, Cloud Computing, Software Systems Engineering

09/2016 – 06/2021 **B.Sc. Computer Science and Information Technology**, *Oguzhan Engineering and Technology University of Turkmenistan*, Ashgabat, 87/100 (German grade **1.7**)
Focus: C++, algorithms, operating systems, data structures

Research and Projects

09/2026 – 03/2027 **Master's Thesis**, *TU Ilmenau, Databases and Information Systems Group*
Evaluating Pretrained Time Series Foundation Models for Smart City Sensor Forecasting
- Benchmarking six pretrained models (e.g. Chronos-2, TimesFM-2.5, Moirai-2) against statistical, boosting and deep learning baselines on real smart-city sensor data, with 1,000+ rolling forecasts per model on 4× NVIDIA A100.
- Preliminary pilot: Chronos-2 cut the 24-hour error by 29%, the best trained baseline by 18%. A FastAPI service returns each forecast in 0.5–1.7 s.

04/2026 – 08/2026 **Group Project: LLM Agent for Hardware Verification**, *TU Ilmenau*, team of 3
- Built a Python agent (LangGraph, tool use) that writes SystemVerilog testbenches; three checker sub-agents decide by majority vote.
- Evaluated with mutation testing on VerilogEval designs. Worked on design, build and evaluation.

10/2025 – 03/2026 **Research Project: Zero-Shot Forecasting with LLMs (Grade 1.3)**, *TU Ilmenau*
- Built a FastAPI microservice that forecasts IoT sensor data from the SensBee platform with LLMs; ran 192 experiments with 4 LLMs.
- General-purpose LLMs proved unreliable on numeric sensor data, which led to the thesis topic.

Work Experience

09/2023 – 09/2024 **Software Developer (Mobile, Client Applications)**, *Flipgoo*, Budapest, Hungary
- Built the Flutter marketplace app (buying, selling, shops, premium and business accounts): 33,000+ downloads (23,000+ iOS, 10,000+ Google Play).
- Integrated Firebase, RevenueCat subscriptions, Sentry, Twilio (SMS and calls), Apple and Google sign-in and Google Maps into the production app.

03/2021 – 02/2024 **Software Developer (Mobile, Client Applications)**, *Yashyl Ada*, Ashgabat
- Built two cross-platform iOS/Android apps with backend APIs, Firebase, Sentry and Google Maps.
- Released three apps in the stores; customer satisfaction hit 95% within three months.

11/2020 – 03/2021 **Flutter Developer**, *Freelance*, Ashgabat
- Built a Flutter app for a retailer that increased its revenue by 47%.
- Built an online shop with 20,000+ downloads and 100,000+ transactions.

12/2019 – 11/2020 **Junior Software Developer (Mobile)**, *Sanly Galam*, Ashgabat
- Covered about 90% of the app lifecycle, from concept and testing to support.
- Improved a production app's performance by 70% through bug analysis and refactoring.

Awards and Qualifications

10/2024 – 03/2027 **Full DAAD Scholarship**, *German Academic Exchange Service*, Bonn, for academic merit

12/2020 **1st of 23 Teams, Healthcare**, *Digital Solution 2020, Turkmen Communications Agency*, Ashgabat
Led the development and launch of a working e-health system for doctors and patients.

03/2022 – 07/2022 **GRE Course, completed with 90%**, *American Councils*, Ashgabat

Skills

Languages

Uzbek, Turkmen	Native	
Turkish	Fluent	
English	Proficient (C1)	*TOEFL iBT 108/120*
Russian	Advanced	
German	Elementary (A2)	*TU Ilmenau A2.3 (grade 1.3); B1 in progress*

IT Skills

Programming	Python (NumPy, pandas), C/C++, Java, Dart, Swift, SQL
AI and ML	PyTorch, TensorFlow/Keras, Hugging Face, AutoGluon, LangGraph
Systems	Linux, HPC (NVIDIA A100), Docker, FastAPI, Git/GitLab, PostgreSQL, MongoDB
Mobile, web	Flutter, Firebase, RevenueCat, Sentry, Twilio, Django

Bremerhaven, 13 November 2026
